Intensive and Critical Care Nursing (1994) **10**, 316–317
© Longman Group Ltd 1994

Subject index

A

Aftercare, intensive care, 89
Arterial cannulae, 0.9% sodium chloride solutions for maintaining patency with, 23
Arterial pressure, mean, lung injury and its effects on, during suctioning, 171

B

Bereavement care, 265
  ICU–GP relationship in, 257

C

Cannulae, arterial/venous, 0.9% sodium chloride solutions for maintaining patency with, 23
Cardiac problems, *see* Heart
Catheter, arterial/venous, 0.9% sodium chloride solutions for maintaining patency with, 23
Change of nursing model in general ITU, introducing, 26
Chest pain, ischaemic, coronary care unit patients'/nurses' ratings of intensity of, 83
Children
  hallucinations following cardiac surgery, 209
  visiting family members in intensive care, 289
Communication
  patient–nurse, 93, 142
  relative–nurse, 64
Computerised care plans, nurses' attitudes toward, 2
Coronary care patients
  care and rehabilitation in USA of, 293
  family/relatives of
    care and rehabilitation in USA concerning, 293
    nurses' attitudes to visits by, 224
  ischaemic chest pain intensity in, patients'/nurses' ratings, 83

D

Death of patient, relatives following, *see* Bereavement
Decision-making, ethical, 58
Die, patients' rights to, 278
Discharge after intensive care, problems following, 244
Distress in intensive care, elderly patients' experiences, 133
Do-not-resuscitate orders in ICU, uses and effects, 12

E

Elderly patients' experiences of pain and distress in intensive care, 133
Emergency assistance, when to summon, 115
Ethical decision-making, 58

F

Family, *see* Relatives

G

General practitioner–ICU relationship concerning bereavement care, 257

H

Hallucinations in children following cardiac surgery, 209
Heart
  coronary disease, *see* Coronary care
  rate, lung injury and its effects on, during suctioning, 171
  surgery
    hallucinations in children following, 209
    recovery units following, 71

I

Immunocompromised patients, immunological knowledge in planning of effective nursing of, 121
Inflammatory response, systemic, intestinal barrier failure and development of, 252
Information needs of patients and relatives in intensive care
  booklet meeting, developing, 271
  pre-operative, 186
Intestinal barrier failure and development of systemic inflammatory response, 252
Ischaemic chest pain intensity, coronary care unit patients'/nurses' ratings of, 83

L

Lung injury, effects on heart rate/mean arterial pressure/oxygen saturation during suctioning, 171

M

Mead model and nursing care plan, update on, 127
Meningococcal meningitis, 199
Models in critical care, nursing philosophy and, 212

Information needs of patients and relatives in intensive care
  booklet meeting, developing, 271
  pre-operative, 186
Intestinal barrier failure and development of systemic inflammatory response, 252
Ischaemic chest pain intensity, coronary care unit patients'/nurses' ratings of, 83

L

Lung injury, effects on heart rate/mean arterial pressure/oxygen saturation during suctioning, 171

M

Mead model and nursing care plan, update on, 127
Meningococcal meningitis, 199
Models in critical care, nursing philosophy and, 212

N

Neophyte ITU nurses, socialisation and communication experiences, 142
Nutrition in critical illness, 165

O

Oxygen saturation, lung injury and its effects on, during suctioning, 171

P

Paediatric cardiac surgery, hallucinations following, 209
Pain
  elderly patients' experiences, 133
  ischaemic chest, coronary care unit patients'/nurses' ratings of intensity of, 83
  postoperative, nurses' assessment and attitudes to, 107
Philosophy and nursing model, 212
Pre-operative information needs of patients and relatives in intensive care, 186
Pulmonary injury, effects on heart rate/mean arterial pressure/oxygen saturation during suctioning, 171

R

Recovery units, cardiac surgery, 71
Relatives and other visitors (of intensive care patients)
  bereavement, *see* Bereavement
  child, 289
  communication between nurse and, 64
  of coronary care patients, *see* Coronary care
  nurses' awareness of potential impact they may have on, 222
  pre-operative information needs, *see* Information needs
Resuscitative measures
  patients' rights regarding, 278
  policy in two teaching hospitals, 12
Right to die, patients', 278

S

Sepsis, terminology used to describe, 252
Socialisation, patient–nurse, 93, 142
Stress, work , causal and emotional factors related to, 41
Suctioning, lung injury and its effects on heart rate/mean arterial pressure/oxygen saturation during, 171
Surgery
  cardiac, *see* Heart
  pain following, nurses' assessment and attitudes to, 107
Systemic inflammatory response, intestinal barrier failure and development of, 252

T

Touch and visualisation facilitating a therapeutic relationship, 51
Transplantation issues in UK, 105
Transport systems for the critically ill, 179
Turnover, nurse, nurse wastage related to, 32

U

United States of America, care and rehabilitation coronary care patients and their families in, 293

V

Venous cannulae, 0.9% sodium chloride solutions for maintaining patency with, 23
Ventricular septal defects, 195
Visitors, *see* Relatives
Visualisation, touch and, therapeutic relationship facilitated via, 51

W

Wastage, nurse, nurse turnover related to, 32
